**This is in reference to the VCS project 5194 titled "BIODIESEL PROJECT BY CHEMENERGY BIOFUELS LIMITED".**

Biodiesel Project by Chemenergy Biofuels Limited (hereafter referred to as "the Project") is located at Village Ban, Pahasu Chatari Road, Tehsil Shikarpur, Distt. Buland Shahar, State UP of India. The project is constructed and operated by Chemenergy Biofuels Limited and is designated to produce biodiesel with capacity of 175 TPD.

The technology employed for biodiesel production is transesterification of waste oils/ Tallow with alcohol which gives biodiesel. The by-product produced is glycerine which is further sold out. The installed production capacity of the production plant is:

Particular	Type	Quantity with Unit
Bio Diesel	Product	175 TONS PER DAY
Glycerin	By Product	30 TONS PER DAY

The project activity involves the production of biodiesel by converting waste oil/fats into useful energy resources, thereby conserving limited fossil fuel reserves. This not only results in significant greenhouse gas (GHG) emission reductions compared to conventional fossil fuel-based systems but also minimizes emissions associated with fossil fuel combustion that would have occurred in the absence of the project activity.

**Chemenergy Biofuels Limited (Project Proponent) hereby declares that "Carbon credits may be issued through Verified Carbon Standard project 5194 for the greenhouse gas emission reductions or removals associated with Chemenergy Biofuels Limited, the biodiesel emissions footprint is changed by the project activities."**

The statement is issued in accordance with the requirement of paragraph 3.24.7 of the VCS standard version 4.7, "Where the project proponent(s) or authorized representative is a buyer or

Particular	Type	Quantity with unit
Bio Diesel	Product	175 MT per day
Glycerol	By Product	20 Tons per day

The project activity involves the production of biodiesel by converting waste oil into useful energy resources, thereby conserving limited fossil fuel resources. This project is a 100% clean and green energy project. The project will produce 175 MT per day of biodiesel and 20 Tons per day of glycerol. The project will also produce 100 Tons per day of CO<sub>2</sub> emissions. The project will also produce 100 Tons per day of CO<sub>2</sub> emissions. The project will also produce 100 Tons per day of CO<sub>2</sub> emissions.

Chemenergy Biofuels Limited (Project Proponent) hereby declares that "Carbon credits may be issued through Verified Carbon Standard project 200 for the greenhouse gas emission reductions or removals associated with Chemenergy Biofuels Limited the biodiesel emissions footprint is changed by the project activities."

The statement is made in accordance with the requirement of paragraph 2.2.1 of the VCS standard version 4.2 "which the project proponent or authorized representative shall make."
